cuerpo

EPD's (Expected Progeny Differences) : predict differences in progeny performance, and are calculated from comparisons within Contemporary Groups.

ACC (Accuracy Values) : Akaushi EPD's are accompanied with a corresponding accuracy value, which measures the strength of the relationship between the genetic prediction (EPD) and true genetic value. Accuracies are reported as a decimal number from zero to one. As accuracy value approaches 1.0, the EPD is "accurately" or closely estimating the true genetic merit of an animal for a given trait.

BW : BIRTH WEIGHT EPD

WW : WEANING WEIGHT EPD

YW : YEARLING WEIGHT EPD

MK : MATERNAL MILK EPD

CED : CALVING EASE DIRECT

CEM : CALVING EASE MATERNAL

IMF : INTRAMUSCULAR FAT

REA : RIBEYE AREA

FAT : 12TH RIB FAT THICKNESS
